ON-ROAD HOSE

High-quality, robust abrasion-resistant hydraulic and industrial hose for heavy-duty commercial vehicles

OUR RANGE OF ON-ROAD HOSE

We offer a complete range of affordable, high-quality hydraulic and industrial hose and fluid connectors all available from our network of local branches. Our skilled in-branch and mobile technicians are available to help you. We have many years experience working with customers in the commercial motor sector and we're confident we can find the solution to match your needs.

Car transporters

Hydraulic hose is used to control the raising and lowering of decks on car transportation vehicles.

A blown hose can result in missed connections and costly delays transporting vehicles to their destination.

High-quality, reliable hydraulic hose is vital to maintain timely operations and minimise costly downtime.

Sewage pumping

Regular maintenance of sewage and drain systems is vital for reducing environmental pollution and preventing health hazards.

Hydraulic and industrial hose is used from the high pressure pump to the hose jet nozzles, which require high abrasion and weather resistant properties.

A robust, low-weight, low-abrasion, high flow-rate suction and delivery hose is required to withstand the gruelling demands of repeated underground flushing.

Refuse vehicles

Hydraulic hose is used on cylinders and valves that control the lifting, filling, compacting and dumping functions of refuse vehicles.

When a hose fails it impacts on the scheduled collection of waste, resulting in a build-up of refuse, missed collections and environmental health risks.

Our abrasion-resistant hose is designed to work under high-pressure during continuous stop-start heavy-duty cycle times.

Comp Oil 800

Made for the transportation of a number of different petroleum products under pressure as well as suction. This hose is used in connection with loading and unloading fuel trucks and tank wagons on railways, it is also used for the transportation between different tanks. Especially made for distributing oils, gasoline, diesel, lubrication oils and paraffin. It is 100% aromatically resistant. Electric continuity is attained when the two spirals are put towards the hose's fittings. By doing this, static electricity is avoided. The electrical resistance in an assembled hose is less than 10 Ohm, according to BS 5842:1980 § 6.2. On request a Special flame resistant version can also be delivered.

Code: 1581-00

Kappaflex 2K CO Rock

Ozone-resistant hose for applications with high pressures and high abrasion. Impulse tested up to one million cycles. Exceeds EN 857 2SC.

Code: 1105-63

Spirabel GMDS Light PVC

A corrugated, PVC, green spiral hose that's both shockproof and lightweight. Suitable for multi-purpose suction and delivery applications.

Code: 1508-50

Aquasewer, Flushing Hose

A hose suitable for high pressure sewage systems. It has a low weight compared to rubber hoses, which leads to less abrasion and increased flowing speed. This hose can sustain 3-4 times more external abrasion compared to a traditional rubber hose.

Code: 1419-xx

Hi-Temp

This hose is suitable for hydraulic pipes, truck engines and transportation of oil and gasoline with extra high temperatures.

Code: 1071-00

HYDROSCAND ACCESSORIES

Flat-face Couplings

Oil

Oil clean-up

Work gloves

Bauer couplings

Ball valves
