

Staloc 5S72 Pipe thread sealant, low-strength, 250 ml

Product group	510
Sealant type	Pipe
Manufacturer	Staloc
Max temperature (°C)	150
Min temperature (°C)	-55

Used to seal conical or cylindrical pipe threads. Prevents leakage of gas, LPG, pressurized air, oil, gasoline, water and many other chemical substances. Highly resistant against corrosion, water, gas, various oils, hydrocarbons and many other chemicals. Its thixotropic consistency avoids running off. Highly shock and vibration resistant. The contained PTFE powder lowers the friction. Approved according to DVGW (DIN 751-1), KTW (use in contact with drinking water), NSF and AGA.
